Subject: Com Strat for Dewey Burdock
Draft Communications Strategy Final UIC Dewey Burdock Permits version 2 clean.docx

Deb, I'm attaching the communication strategy for Dewey. As I mentioned this am, there is one item for you – notification to Hunter that the permits have been signed. There is obviously a lot of information in the strategy, however I don't see that you need to go into any detail for that call. Douglas will send links to the permits and associated documents when he reaches out to this counterparts at SDDENR. The main message:

Following careful consideration of all public comments received in response to issuing draft permits and an aquifer exemption (AE) in connection with Powertech's application for In-Situ Recovery of uranium in the Black Hills of South Dakota, EPA is issuing the Final UIC Permits and the AE Record of Decision (ROD).

EPA has prepared a Response to Comments document which lists all the changes EPA incorporated into its Final UIC Permits in response to public comments. This document also specifically addresses all relevant comments received on the Draft UIC Permits and supporting documents. In issuing its Final Permit and AE decisions, EPA has also notified the applicant, and interested tribal governments, and each person/party who submitted comments or requested notice of the Final Permit and AE decisions.

Also, the highlighting in the document reflects the new information related to finalizing the permits.

Let me know if you have questions or would like any additional information.

Thanks!
D
